Viking Grave

A pagan grave was found here in the summer of 1962. A burial mound had been raised over an 18-25 year-old male. The skeleton was found reasonably intact. Items of value were also in the grave. There was a sword (95 cm/38 in. long), a spearhead (21.5 cm/8.5 in. long) and a bone pin (12 cm/5 in. long). Also in the grave were a broken knife, an elaborate shield boss and pieces of iron. Thorkell Grímsson excavated the grave for the National Museum of Iceland, where the skeleton and the articles are preserved.

Máriusandur

moss, impression

A photograph of a rugged coastline. In the foreground, numerous large, dark rocks are covered in a thick, vibrant green moss. The rocks are scattered across a pebbly shore. In the middle ground, the sea is visible with some white foam from breaking waves. In the background, a prominent sea stack rises from the water, and a dark, forested hillside slopes down towards the beach. The sky is overcast and grey.

alpgehnuss.ch

Máríusandur

Bladder wrack

fucus vesiculosus

A photograph of a coastal landscape. In the foreground, a dark, pebbly beach leads up to large, light-colored rock formations. These rocks have distinct horizontal layering and are partially covered with green and yellowish-brown lichen or algae. To the right, a taller, darker rock formation rises, also showing layering. The ocean is visible in the background, with some smaller rocks in the water. The sky is overcast and grey. A semi-transparent watermark is visible in the upper left area of the image.

Hellnar, Bárðarlaug

A photograph of a rocky landscape. In the foreground and middle ground, there are numerous dark, wet-looking rocks of various sizes. These rocks are heavily covered with bright green moss, which appears to be growing in clumps. The moss is a vibrant yellow-green color. The rocks are scattered across a grassy area. In the background, there is more grass and some small, purple, star-shaped flowers. The overall scene is a natural, outdoor setting, likely a mountain or alpine area. The text 'alpgehnuss.ch' is overlaid in the upper left quadrant of the image.

The hot spring Deildartunguhver is among the most voluminous hot springs in Europe. On average, its flow is approximately 180 litres of 100°C hot water per second. Deildartunguhver has been listed in the Icelandic National Heritage Registry since 1978.

Water from Deildartunguhver has been utilised for district heating since 1925. A conduit from the hot spring and to the towns Akranes, Borgarnes and Hvanneyri was laid between 1979 and 1981 and is one of the longest geothermal conduits in the world at 64 km.

Akranes

Skólabraut, Akranes Kirkja

The image shows the interior of Akranes Church, a Lutheran church in Iceland. The space is characterized by its high, vaulted ceiling with decorative arches and a balcony with a wooden railing. The walls are painted in a light yellow color, and the floor is covered with red carpeting. In the center, there is an altar with a green cloth and a wooden railing, topped with a cross and a statue of a saint. To the right of the altar is a pulpit with a wooden frame and a blue cloth. A large, arched window on the right side of the church allows natural light to enter. The overall atmosphere is serene and traditional.
